

Premium Masking Tapes for Waterborne Paint Systems

The American® Brand... New Solutions... That's the American Way!

Whether you're an auto repair professional or not, chances are you heard something about "going green" today, or you heard what your "carbon footprint" looked like last year.

American® Tape is the undisputed leader offering premium masking solutions that perform with waterborne paint systems. American® brand products provide the perfect solution for body shop owners and help technicians as they meet the lower VOC requirements. With the switch from solvent-borne to waterborne systems, automotive refinishers can reduce their emissions by as much as 38%. This is a huge step in reducing the carbon footprint. American Tape continues to add new masking solutions to allow our customers to have a seamless transition to waterborne paint systems.

That's the American Way!
