Norton Foam Masking Tapes

Norton foam masking tapes are easy-to-use, time-saving products to mask door jambs and other apertures like hood and deck lid openings that need to be sealed during the painting process. Foam masking tape produces a soft edge, rather than a hard paint line, so rework is eliminated and productivity increases.

#70746 - Premium Foam Masking Tape (3/4" x 54.6 yds)

#70735 - Foam Masking Tape (1/2" x 54.6 yds)

Trim Masking Tape

Eliminate the cost of removing and installing moldings, the potential damage to moldings, and the labor to remove paint lines on existing moldings by simply protecting them properly during the painting process. By using the Norton "one-size-fits-all" trim masking tape, you can lift the molding away from the surface to be painted and protect the molding from paint and overspray. Norton trim tape is perforated for easy tear-off and is flexible to follow contours and tight curves.

#06169 - Trim Masking Tape (2" x 10.94 yds)
